PROFILE

Bachelor's degree in Information Technology graduate with a strong foundation in Python, Object-Oriented Programming (OOP), Data Science, Machine Learning, Deep Learning, Natural Language Processing (NLP), Computer Vision, and Generative AI. Proficient in NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow, Keras, and OpenCV, with knowledge of SQL for database management and data analysis. Hands-on experience with data preprocessing, exploratory data analysis (EDA), machine learning model development.

EDUCATION

Mookambikai college of engineering – 7.2 CGPA
B.TECH-Information Technology

Pudukottai, Tamil Nadu
2022-2026

TECHNICAL SKILLS

Languages: Python(OOP).

Data Science & Machine Learning: Machine Learning, Deep Learning, Natural Language Processing, OpenCv, Generative AI.

Libraries & Frameworks: NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow.

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Colab.

Databases: SQL .

INTERNSHIP

Java Full Stack Development | Intern pro | Aug 2025 – Sep 2025

- Completed a Java Full Stack Development Internship with hands-on exposure to full-stack web application development and software development practices.
- Gained practical knowledge of Core Java, OOP concepts, HTML, CSS, JavaScript, Spring Boot and SQL.

DATA SCIENCE INTERN | The Mind IT, Trichy | Sept 2025 – Oct2025

- Completed a 30-day internship focused on Data Science, data preprocessing, exploratory data analysis (EDA), and data visualization.
 - Performed data cleaning, missing-value handling, data aggregation, and exploratory analysis to identify meaningful patterns and trends. Developed Book Rating Analyser to identify top-rated books, user trends, reader preferences, and genre-wise patterns.
-

PROJECTS

Blockchain-driven Biometric E-Voting System for Secure and Transparent elections

- Developed a blockchain-based biometric e-voting system to enable secure, transparent, and reliable digital elections. Implemented biometric authentication to verify voter identity and prevent unauthorized access and duplicate voting.
- Designed a secure voting workflow covering voter registration, identity verification, vote casting, and transaction recording.

Customer Churn Prediction with Machine Learning

- Built a Machine Learning model using Python and Random Forest to predict whether telecom customers are likely to churn based on customer, service, and billing data.
 - Developed a Streamlit web application to provide real-time churn predictions and churn probability for new customers.
-

CERIFICATE

- Python for Data Science – Provided by IBM (June 2025)
- Data Analysis – Provided by Infosys | Springboard (2025)
- Generative AI in Action – Issued by IBM SkillsBuild (2025)
